Subject Fw: Signed Discovery

Ron attached is a Discovery form for the Former Lyons Diecasting site in Buckner, Jackson County. We would like the Discovery date and start date of PA/RSE to be 5/14/2008 because we started working on the PA part yesterday. There are abandon drums of ignitable waste on site which we will be referring to EPA for removal however before we send an official referral we want complete the removal evaluation because we think there more there that will need to addressed by the removal program. So we would like to make our referral as complete and detailed as possible. Scott if you would like to assign an OSC we will coordinate with them during the assessment process like we did at Hill Plating , Americo etc. This has worked well and it eliminates duplication of effort and maximizes our resources. Plus it's a good learning experience for my staff, half of which have been here a year or less. If you have any questions please let me know. The state Site Assessment Project Manager for this site is Jerry Cluck 573-751-1313
jerry.cluck@dnr.mo.gov

Thanks

Julieann F. Warren
Chief, Superfund Site Assessment Unit
Hazardous Waste Program QA Coordinator
